# Horizon Europe
# Calls for submission in spring 2022

Horizon Europe offers funding opportunities for many exciting research topics. However, due to their size joint European research projects require sufficient lead time. Therefore, we would like to inform you in this newsletter well in advance on upcoming calls in Horizon Europe with deadlines in February, March and April 2022.

**Joint European research projects are funded in the second of the three pillars of Horizon Europe. In six clusters, the EU wants to tackle global challenges. Calls in this pillar have a solution-oriented focus and are usually multi- and interdisciplinary. Funded research groups must include partners from several EU member states or associated third countries. These framework conditions require partner search and coordination before an application can be submitted.**
**In this newsletter, we will explain how to find a suitable call for your research in pillar 2 of Horizon Europe. We will also explain ways of becoming a partner in a joint research project.**

## Calls in the current Work Programme

Horizon Europe offers planning certainty. The upcoming calls for the next two years are published in **separate Work Programmes for each cluster** well in advance of their deadlines. We have selected calls for research and innovation actions (RIA) with deadlines in spring 2022 from the Work Programmes. You will find call names and topics in **the tables in the appendix below**.

**For descriptions of these published calls**, please refer to the Work Programme pdfs (see links given in the appendix) or go to the Funding & Tenders portal of the EU (EU portal). We recommend to use the Work Programme pdfs, just enter the title of an interesting call in the search box.

## Coordinator or Beneficiary

There are two possible roles in a joint European research project for a researcher and her/his institution, Coordinator or Beneficiary.

- As a **Coordinator** you have to manage the consortium on a day-to-day base, in addition to your actual research. On the plus side, you have the most influence on the composition of the consortium and on the research direction of your project. You should consider coordinating a project if you have a good network of potential partners and if you want to take on a leading role in your research field.
- As a **Beneficiary** you are one of many partners in the consortium and contribute to one or several specific research questions of the project. Your responsibility will be restricted to certain tasks or perhaps one or two work packages.

No matter whether you will be Coordinator or Beneficiary, your role and your tasks will need to be discussed with all partners of the consortium. If you find an interesting call in the tables below and have already a network of potential partners at hand, you should consider the lead in a project as Coordinator. Otherwise, we recommend the role of Beneficiary in these calls for spring 2022 as it takes some time to create a new consortium.

## How to become a Beneficiary

There a different ways to become a partner in a joint European research project. It is easiest when you know someone who intends to coordinate a project. If you see an interesting call, ask and listen to your network. Otherwise you have the following options:

- You can offer your expertise for specific calls in the Funding & Tenders portal (EU portal).
- The NCPs (National Contact Points) offer partnering tools and organise brokerage events at certain times or to specific topics (NCP network).
- Our partners at BayFOR (bayfor.org) can support you in looking for project partners.

Feel free to contact us (research support office) if you want to go for any of these options.

In the following, you will find the RIA calls for each cluster. Be aware that the EU research agenda in pillar 2 is **driven by challenges.** Therefore, **your expertise may be needed in areas you are not expecting**. E.g. research questions for social science and humanity are often integrated in projects for technology development and implementation. Therefore, look at all calls that catch your eye.

And again**, if you have any questions, feel free to contact us at the research support office**. We are glad to help you find the right projects.
